

# **POSITIONING ANALYSIS OF A WEBSITE MADE IN FLASH TECHNOLOGY**

Summary – Web sites made in Flash technology offer a wide range of possibilities, which can not be obtained in other technologies. An important feature of the web sides made in this technology is the correct display in all available web browsers. The overall aim of this article was to learn what methods are available for positioning web sites made in Flash. Is there such a method, if so, how to use them in action and ready to implement a working website.
